

STATE PROFILE REPORT  
06.25.2021

# TENNESSEE

## STATE SYNOPSIS

	LAST WEEK	CHANGE FROM PREVIOUS WEEK
RATE OF NEW COVID-19 CASES PER 100,000	11	-27%
NUCLEIC ACID AMPLIFICATION TEST (NAAT) POSITIVITY RATE	2.5%	+0.2%
NEW CONFIRMED COVID-19 HOSPITAL ADMISSIONS / 100 BEDS	1	-29%
RATE OF NEW COVID-19 DEATHS PER 100,000	0.4	+76%
COMMUNITY TRANSMISSION LEVEL	MODERATE TRANSMISSION	
PEOPLE RECEIVED AT LEAST 1 DOSE	2,815,107 people	41.2% of total pop.
PEOPLE 18+ RECEIVED AT LEAST 1 DOSE	2,728,355 people	51.3% of 18+ pop.
PEOPLE FULLY VACCINATED	2,376,792 people	34.8% of total pop.
PEOPLE 18+ FULLY VACCINATED	2,322,534 people	43.7% of 18+ pop.

### SARS-CoV-2 Variants of Concern

- The following proportions of variants of concern have been identified in [Tennessee](#): B.1.1.7 (Alpha, 82.0%), B.1.351 (Beta, 1.5%), B.1.617.2 (Delta, 1.5%), P.1 (Gamma, 9.8%)

To more accurately describe the laboratory data that are being collected and presented for COVID-19, CDC is moving away from using the term reverse transcriptase polymerase chain reaction (RT-PCR), and instead moving to the more inclusive term Nucleic Acid Amplification Test (NAAT), which includes RT-PCR and other methods. These additional tests were always included in testing data. Since the beginning of the COVID-19 pandemic, both the number and types of NAATs authorized for emergency use by the FDA for the detection of SARS CoV-2 has increased. We are adjusting all products to this new term. More info here: <https://www.cdc.gov/coronavirus/2019-ncov/lab/naats.html>.

CONFIRMED NEW COVID-19 HOSPITAL ADMISSIONS (RATE PER 100 BEDS)	142 (1)	-29% (-29%)	3,930 (3)	12,824 (2)
NUMBER OF HOSPITALS WITH SUPPLY SHORTAGES (PERCENT)	9 (8%)	+0%	49 (5%)	328 (6%)
NUMBER OF HOSPITALS WITH STAFF SHORTAGES (PERCENT)	9 (8%)	-18%	97 (10%)	606 (11%)

\* Indicates absolute change in percentage points.

\*\* Due to delayed reporting, this figure may underestimate total diagnostic tests and week-on-week changes in diagnostic tests.

† 86% of facilities reported during the most current week.

## DATA SOURCES

**Note:** Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.**Cases and Deaths:** State values are aggregated data provided by the states to the CDC. Historical reports of cases and deaths exceeding 1% of the total new cases or deaths reported in the US that day have been excluded. Data is through 6/24/2021; previous week is from 6/11 to 6/17.**Testing:** CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods. Test positivity through 6/22/2021; previous week is from 6/9 to 6/15. Test volume through 6/18/2021; previous week is from 6/5 to 6/11.**SNFs:** Skilled nursing facilities. National Healthcare Safety Network. Data is through 6/20/2021, previous week is from 6/7 to 6/13.**Admissions:** Unified Hospitals Dataset in HHS Protect. Data is through 6/23, previous week is from 6/10 to 6/16.**Shortages:** Unified Hospitals Dataset in HHS Protect. Values presented show the latest reports from hospitals in the week ending 6/23/2021 for staffing and the week ending 6/23/2021 for supplies.**METHODS:** Details available on last two pages of report.

STATE PROFILE REPORT | 06.25.2021

## STATE VACCINATION SUMMARY

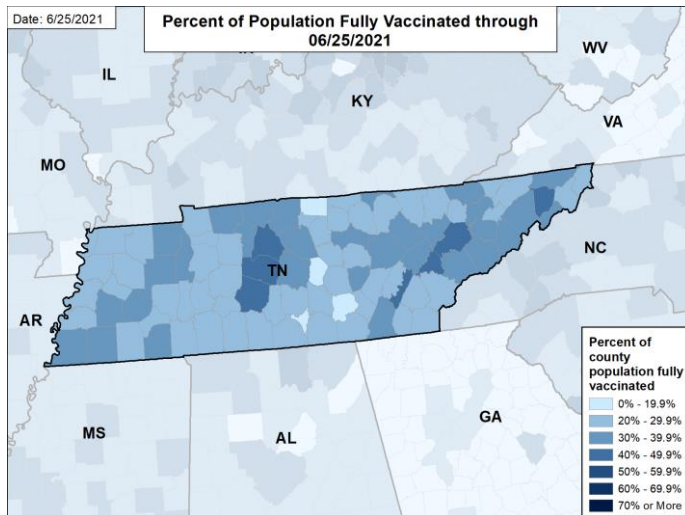

### DOSES DELIVERED

6,286,870  
92,059 per 100k

### DOSES ADMINISTERED

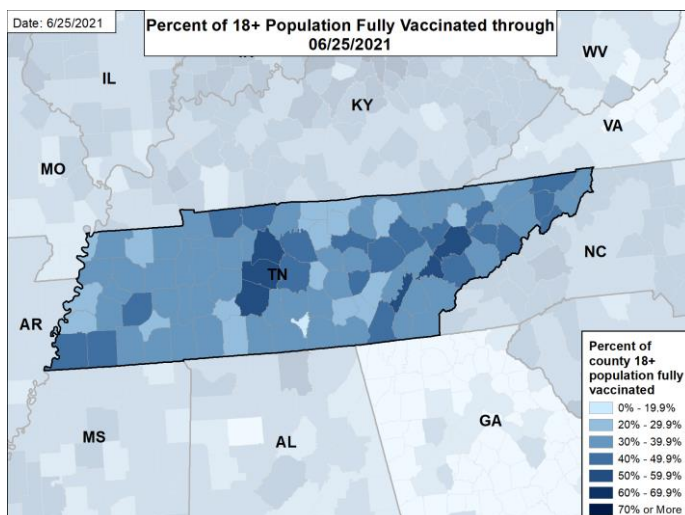

5,201,921  
76,172 per 100k

### PERCENT OF POPULATION FULLY VACCINATED

	RECEIVED AT LEAST ONE DOSE	FULLY VACCINATED
ALL PEOPLE	2,815,107 41.2% of total pop.	2,376,792 34.8% of total pop.
PEOPLE 12-17	86,243 16.7% of 12-17 pop.	54,146 10.5% of 12-17 pop.
PEOPLE 18+	2,728,355 51.3% of 18+ pop.	2,322,534 43.7% of 18+ pop.
PEOPLE 65+	893,498 78.1% of 65+ pop.	799,242 69.9% of 65+ pop.

### PERCENT OF 18+ POPULATION FULLY VACCINATED

### PERCENT OF 65+ POPULATION FULLY VACCINATED

### DATA SOURCES

County reporting completeness for Tennessee is 97.8%.

**Vaccinations:** [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 13:22 EDT on 06/25/2021. Data last updated 06:00 EDT on 06/25/2021. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Allocations are made pro rata (equal based on population) from which jurisdictions are then to order.

**METHODS:** Details available on last two pages of report.

# TENNESSEE

STATE PROFILE REPORT | 06.25.2021

117 hospitals are expected to report in Tennessee

## HOSPITAL ADMISSIONS

## HOSPITAL PPE SUPPLIES

### DATA SOURCES

**Hospitalizations:** Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. Data is through 6/23/2021.

**PPE:** Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Values presented show the latest reports from hospitals in the week ending 6/23/2021.

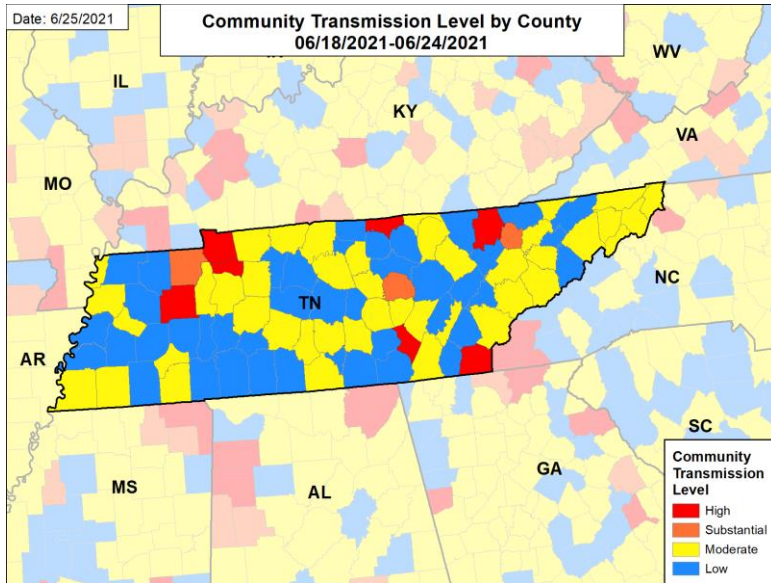

**METHODS:** Details available on last two pages of report.

STATE PROFILE REPORT | 06.25.2021

## COMMUNITY TRANSMISSION BY COUNTY AND METRO AREA

### COUNTIES AND METRO AREAS BY COMBINED TRANSMISSION LEVEL

CATEGORY	LOW TRANSMISSION BLUE	MODERATE TRANSMISSION YELLOW	SUBSTANTIAL TRANSMISSION ORANGE	HIGH TRANSMISSION RED
# OF COUNTIES (CHANGE)	42 (↑34)	43 (↑20)	3 (↓21)	7 (↓33)
# OF METRO AREAS (CHANGE)	12 (↑12)	14 (↑4)	1 (↓8)	0 (↓8)

**All Blue Counties:** Davidson, Rutherford, Williamson, Bradley, Hamblen, Madison, McMinn, Tipton, Cumberland, Putnam, Anderson, Hardin, Hardeman, Gibson, Weakley, Loudon, Lawrence, Trousdale, Roane, Cheatham, Claiborne, Decatur, Rhea, Lauderdale, Hawkins, Lewis, Macon, Marion, Overton, Obion, Moore, Grundy, Franklin, Cocke, Perry, Haywood, Cannon, Henderson, Wayne, Scott, Giles, Jackson

**All Blue CBSAs:** Nashville-Davidson--Murfreesboro--Franklin, Jackson, Tullahoma-Manchester, Athens, Crossville, Cookeville, Martin, Lawrenceburg, Dayton, Newport, Brownsville, Union City

**All Yellow Counties:** Shelby, Knox, Hamilton, Montgomery, Sevier, Sumner, Wilson, Sullivan, Maury, Washington, Blount, Greene, Bedford, Robertson, Lincoln, Carter, McNairy, Jefferson, Fayette, DeKalb, Dyer, Marshall, Warren, Monroe, Coffee, Dickson, Johnson, Hickman, Morgan, Bledsoe, Meigs, Unicoi, Crockett, Benton, Grainger, Smith, Chester, Humphreys, Van Buren, Fentress, Lake, Hancock, Pickett

**All Yellow CBSAs:** Memphis, Knoxville, Chattanooga, Clarksville, Sevierville, Johnson City, Kingsport-Bristol, Morristown, Greeneville, Cleveland, Shelbyville, Dyersburg, Lewisburg, McMinnville

**All Orange Counties:** Henry, Union, White

**All Orange CBSAs:** Paris

**All Red Counties:** Stewart, Sequatchie, Polk, Carroll, Campbell, Clay, Houston

### DATA SOURCES

Maps and figures reflect 7-day average of data from 6/18-6/24 (cases), 6/16-6/22 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

**Note:** Most recent days may have incomplete reporting.

**Cases:** County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 6/24/2021.

**Testing:** CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 6/22/2021.

**Combined Transmission Level:** If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

**METHODS:** Details available on last two pages of report.

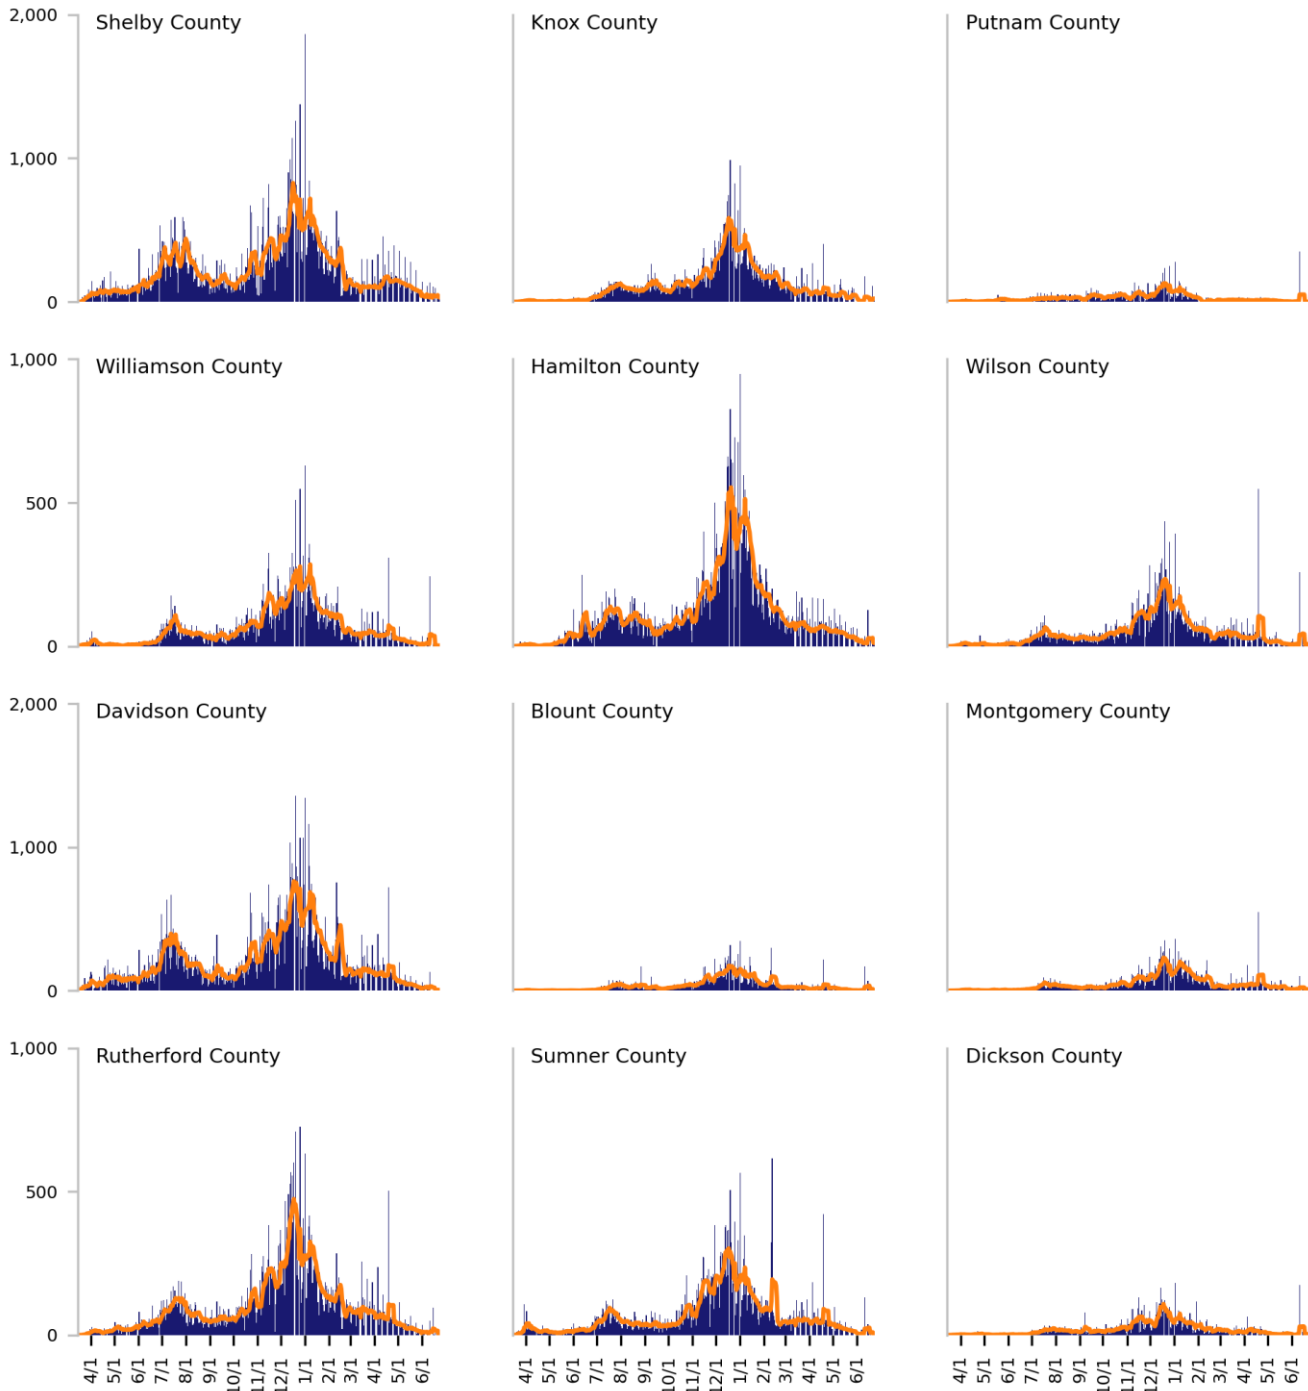

# Top 12 counties based on number of new cases in the last 3 weeks

The scale is fixed per row based on the historical peak number of daily cases\*

— Daily COVID-19 Cases (7-day average)    ■ Daily COVID-19 Cases

TOTAL DAILY CASES

\* The vertical scale of plots is fixed per row based on the historical peak number of daily cases; use caution when comparing visuals across different rows.

#### DATA SOURCES

**Cases:** County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 6/24/2021. Last 3 weeks is from 6/4 to 6/24. Counties are listed in order of the number of cases in the last three weeks, from largest to smallest.

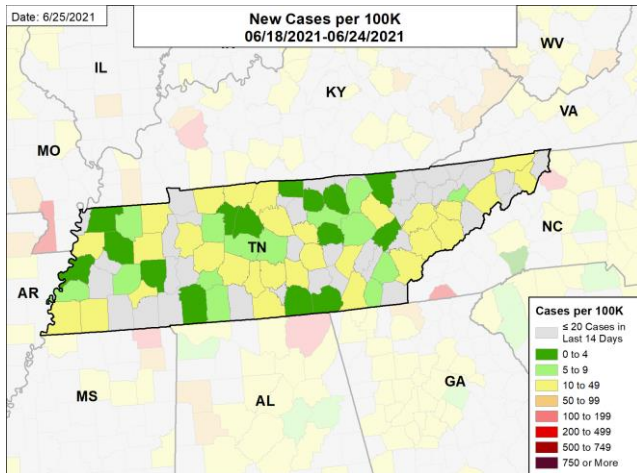

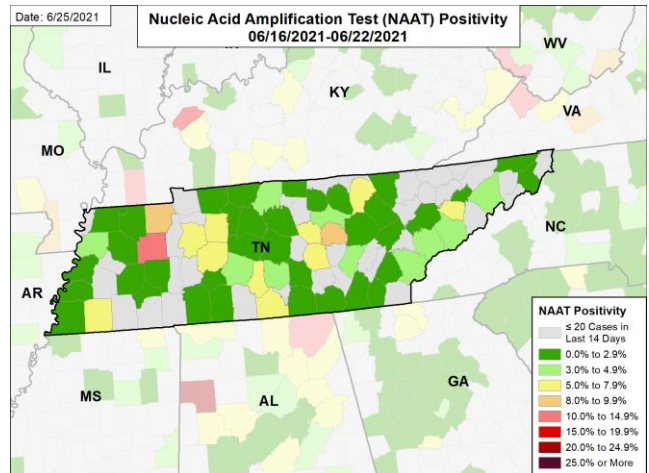

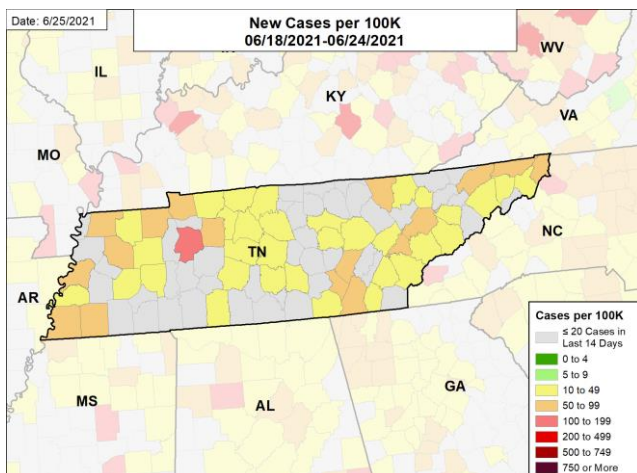

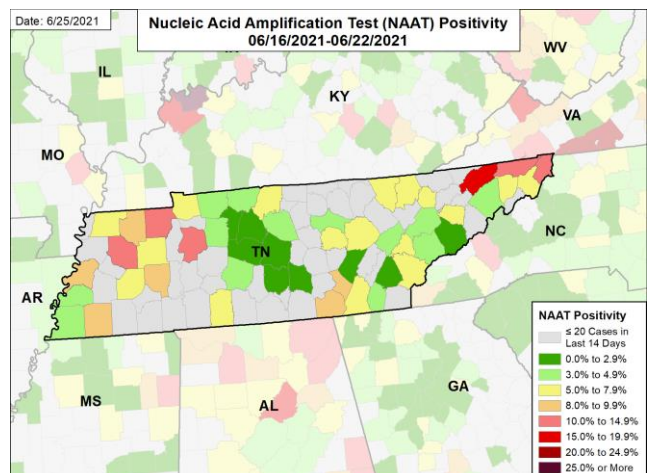

**METHODS:** Details available on last two pages of report.

## PERCENT OF 18+ POPULATION FULLY VACCINATED

## PERCENT OF 65+ POPULATION FULLY VACCINATED

### DATA SOURCES

**Vaccinations:** [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 13:22 EDT on 06/25/2021. Data last updated 06:00 EDT on 06/25/2021. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Allocations are made pro rata (equal based on population) from which jurisdictions are then to order. The following states have ≤80% completeness reporting vaccinations by county, which may result in underestimates of vaccination data for counties: CO (75%), VT (74%), WV (56%), GA (52%), VA (51%), TX (0%), and HI (0%).

**METHODS:** Details available on last two pages of report.

NATIONAL COVID-19 VACCINE SUMMARY AS OF 6/25

<b>DOSES DELIVERED</b>	380,222,670 114,526 per 100k	<b>DOSES ADMINISTERED</b>	321,199,379 96,748 per 100k
<b>PEOPLE RECEIVED AT LEAST ONE DOSE</b>	178,491,147 53.8% of total pop.	<b>PEOPLE FULLY VACCINATED</b>	151,615,554 45.7% of total pop.
<b>PEOPLE 18+ RECEIVED AT LEAST ONE DOSE</b>	169,898,463 65.8% of 18+ pop.	<b>PEOPLE 18+ FULLY VACCINATED</b>	145,498,715 56.3% of 18+ pop.
<b>PEOPLE 65+ RECEIVED AT LEAST ONE DOSE</b>	47,841,910 87.3% of 65+ pop.	<b>PEOPLE 65+ FULLY VACCINATED</b>	42,351,030 77.2% of 65+ pop.

DAILY NATIONAL COUNT OF VACCINE DOSES ADMINISTERED BY DATE OF ADMINISTRATION

## DATA SOURCES

**Vaccinations:** [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 13:22 EDT on 06/25/2021. Data last updated 06:00 EDT on 06/25/2021. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Allocations are made pro rata (equal based on population) from which jurisdictions are then to order. Due to delays in reporting, data on doses administered in recent days (as reflected by lighter blue coloring in the Daily National Count figure) may be an underestimate of the actual value.

**METHODS:** Details available on last two pages of report.

# National Picture: Vaccinations

## NATIONAL SUMMARY OF VACCINATIONS BY RACE/ETHNICITY

## NATIONAL SUMMARY OF VACCINATIONS BY AGE

### DATA SOURCES

**Vaccinations:** CDC COVID Data Tracker. Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 13:22 EDT on 06/25/2021. Data last updated 06:00 EDT on 06/25/2021. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Allocations are made pro rata (equal based on population) from which jurisdictions are then to order. Race/Ethnicity data were available for 57.3% receiving at least one dose and 62.2% fully vaccinated. Age data were available for 92.2% receiving at least one dose and 92.3% fully vaccinated. Texas does not report demographic-specific dose number information to CDC, so data for Texas are not represented in demographic trends figures. "NH" stands for Non-Hispanic/Latinx, "AI/AN" stands for American Indian or Alaska Native, and "NH/PI" stands for Native Hawaiian or Pacific Islander.

**METHODS:** Details available on last two pages of report.

## NEW CASES PER 100,000 IN THE WEEK:

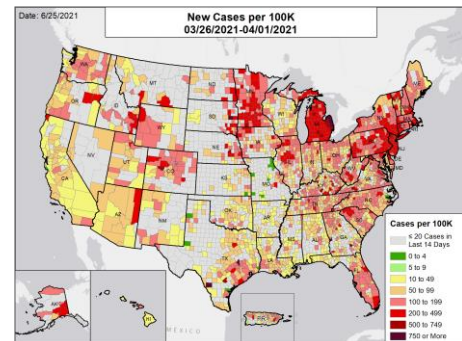

### ONE MONTH BEFORE

### TWO MONTHS BEFORE

### THREE MONTHS BEFORE

## DATA SOURCES

**Note:** Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

**Cases:** County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. State values are aggregated data provided by the states to the CDC. As of 6/4, Florida is only updating their county case data on Fridays, therefore values for the last week may be an underestimate. As of 5/26, Nebraska is reporting by Local Health Department instead of county; therefore, after 5/25 no county case and death data is available. The week one month before is from 5/21 to 5/27; the week two months before is from 4/23 to 4/29; the week three months before is from 3/26 to 4/1.

**METHODS:** Details available on last two pages of report.

## NEW DEATHS PER 100,000 IN THE WEEK:

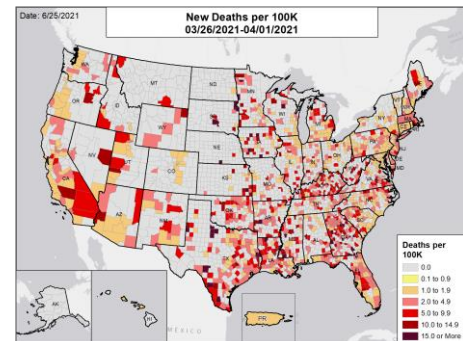

### ONE MONTH BEFORE

### TWO MONTHS BEFORE

### THREE MONTHS BEFORE

## DATA SOURCES

**Note:** Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

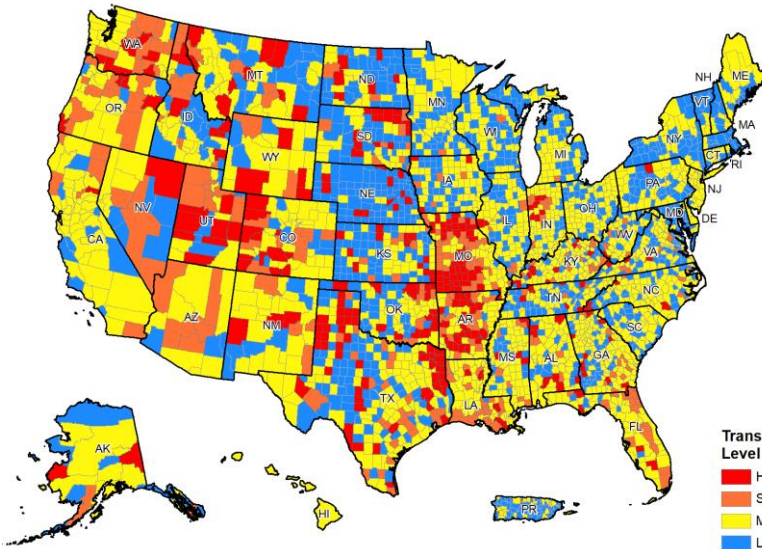

**Deaths:** County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. State values are aggregated data provided by the states to the CDC. As of 6/5, Florida is no longer updating their county deaths data; therefore after 6/4 no county death data is available. As of 5/26, Nebraska is reporting by Local Health Department instead of county; therefore, after 5/25 no county case and death data is available. Puerto Rico is shown at the territory level as deaths are not reported at the municipio level. As of 3/2/2021, Ohio changed their method of reporting COVID-19 deaths and will report deaths on the day of death, not the day of report, which could result in a fluctuation in the number of deaths from recent weeks due to delayed reporting. The week one month before is from 5/21 to 5/27; the week two months before is from 4/23 to 4/29; the week three months before is from 3/26 to 4/1. Nebraska corrected previously reported deaths on 6/21, resulting in a decrease in the total deaths over the pandemic. As such, weekly counts are not reflective of true values.

**METHODS:** Details available on last two pages of report.

CASES PER 100K	0 TO 9	10 TO 49	50 TO 99	100 +
# OF COUNTIES (CHANGE)	1165 (↑143)	1600 (↓54)	295 (↓76)	160 (↓13)
% OF COUNTIES (CHANGE)	36.2% (↑4.4%)	49.7% (↓1.7%)	9.2% (↓2.4%)	5.0% (↓0.4%)
TEST POSITIVITY	0.0% TO 4.9%	5.0% TO 7.9%	8.0% TO 9.9%	10.0% +
# OF COUNTIES (CHANGE)	2584 (↓84)	343 (↑63)	87 (↑3)	206 (↑18)
% OF COUNTIES (CHANGE)	80.2% (↓2.6%)	10.7% (↑2.0%)	2.7% (↑0.1%)	6.4% (↑0.6%)

## COUNTIES BY COMBINED TRANSMISSION LEVEL

CATEGORY	LOW TRANSMISSION BLUE	MODERATE TRANSMISSION YELLOW	SUBSTANTIAL TRANSMISSION ORANGE	HIGH TRANSMISSION RED
# OF COUNTIES (CHANGE)	1079 (↑134)	1540 (↓62)	291 (↓75)	310 (↑3)
% OF COUNTIES (CHANGE)	33.5% (↑4.2%)	47.8% (↓1.9%)	9.0% (↓2.3%)	9.6% (↑0.1%)

### DATA SOURCES

Maps and figures reflect 7-day average of data from 6/18-6/24 (cases), 6/16-6/22 (tests).

**Note:** Most recent days may have incomplete reporting.

**Cases:** County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state Data is through 6/24/2021. As of 6/4, Florida is only updating their county case data on Fridays, therefore values for the last week may be an underestimate. As of 5/26, Nebraska is reporting by Local Health Department instead of county; therefore, after 5/25 no county case data is available.

**Testing:** Combination of CELR (COVID-19 Electronic Lab Reporting) state health department-reported data and HHS Protect laboratory data (provided directly to Federal Government from public health labs, hospital labs, and commercial labs). Data is through 6/22/2021.

**County Percentages:** Based on a denominator of 3,220 county/county-equivalents, including states, the District of Columbia, and Puerto Rico municipalities.

**Combined Transmission Level:** If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

**METHODS:** Details available on last two pages of report.

# DATA SOURCES & METHODS

STATE PROFILE REPORT | 06.25.2021

- Some dates may have incomplete data due to delays and/or differences in state reporting. Data may be backfilled over time, resulting in week-to-week changes. It is critical that states provide as up-to-date data as possible. Figures and values may also differ from state reports due to differing methodologies.
- All population values are vintage 2019 US Census data.
- **Cases and Deaths:** County-level data is from a CDC-managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. State values are aggregated data provided by the states to the CDC. Data is as of 12:59 EDT on 06/25/2021. Cases and deaths are generally shown by date of report. Some states periodically adjust their past data with CDC to show it by case date and death date, as determined by the state. Between adjustments, new cases and deaths continue to be shown by date of report. This can potentially lead to over-estimates of the week-on-week increases in cases or deaths.
  - As of 6/4/21, Florida is only updating their county case data on Fridays, therefore values for the last week may be an underestimate. As of 6/5/21, Florida is no longer updating their county death data, therefore after 6/4 no county death data is available. As of 5/26/21, Nebraska is reporting by Local Health Department instead of county; therefore, after 5/25 no county case and death data is available. As of 3/2/2021, Ohio changed their method of reporting COVID-19 deaths and will report deaths on the day of death, not the day of report, which could result in a fluctuation in the number of deaths from recent weeks due to delayed reporting. Puerto Rico deaths are shown at the territory level as deaths are not reported at the municipio level. Nebraska corrected previously reported deaths on 6/21, resulting in a decrease in the total deaths over the pandemic. As such, weekly counts are not reflective of true values.
  - Historical reports of cases and deaths — for which backfill dates are not available — that exceed 1% of the total new cases or deaths reported in the US that day have been excluded from state daily and weekly trends. However, these are still present in county-level data. Historical reports in the last two weeks (6/11/21 – 6/24/21) are:
    - California cases: 462 on 6/24
    - Delaware deaths: 8 on 6/21
    - Indiana cases: 308 on 6/19
    - Kentucky cases: 50 on 6/23
    - Michigan deaths: 50 on 6/12; 7 on 6/15; 18 on 6/17; 8 on 6/22; and 5 on 6/24
    - Mississippi deaths: 1 on 6/13; 5 on 6/14; 4 on 6/15; 1 on 6/16; 7 on 6/17; 9 on 6/21; and 3 on 6/24
    - Texas cases: 368 on 6/11; 79 on 6/12; 20 on 6/13; 7 on 6/14; 50 on 6/15; 298 on 6/16; 252 on 6/17; 45 on 6/20; 4 on 6/21; 58 on 6/22; 647 on 6/23; and 706 on 6/24
- **Testing:** The data presented represent viral COVID-19 laboratory diagnostic and screening test results — not individual people — and exclude antibody and antigen tests, unless stated otherwise. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods, which were always included in the testing data. CELR (COVID-19 Electronic Lab Reporting) state health department-reported data are used to describe county-level viral COVID-19 NAAT result totals when information is available on patients' county of residence or healthcare providers' practice location. HHS Protect laboratory data (provided directly to Federal Government from public health labs, hospital labs, and commercial labs) are used otherwise. Because the data are deidentified, total NAATs are the number of tests performed, not the number of individuals tested. NAAT positivity rate is the number of positive tests divided by the number of tests performed and resulted. For test positivity, last week data are from 6/16 to 6/22; previous week data are from 6/9 to 6/15; the week one month before data are from 5/19 to 5/25. For number of tests, last week data are from 6/12 to 6/18; previous week data are from 6/5 to 6/11. HHS Protect data is recent as of 10:22 EDT on 06/25/2021. Testing data are inclusive of everything received and processed by the CELR system as of 19:00 EDT on 06/24/2021.
- **Hospitalizations:** Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. In addition, hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. The data presented represents raw data provided; we are working diligently with state liaisons to improve reporting consistency. Data is recent as of 10:26 EDT on 06/25/2021.
- **Hospital PPE:** Unified Hospitals Dataset in HHS Protect. This figure may differ from state data due to differences in hospital lists and reporting between federal and state systems. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. Data is recent as of 10:21 EDT on 06/25/2021.
- **Skilled Nursing Facilities:** National Healthcare Safety Network (NHSN). Data report resident and staff cases independently. Quality checks are performed on data submitted to the NHSN. Data that fail these quality checks or appear inconsistent with surveillance protocols may be excluded from analyses. Data presented in this report are more recent than data publicly posted by CMS. Last week is 6/14-6/20, previous week is 6/7-6/13.
- **State, County, and Metro Area Community Transmission Levels**
  - **High Transmission:** Those states, CBSAs, and counties that during the last week reported 100 or more cases per 100,000 population or a lab test positivity at or above 10.0%.
  - **Substantial Transmission:** Those states, CBSAs, and counties that during the last week reported from 50 to 99 cases per 100,000 population or a lab test positivity from 8.0% to 9.9%.
  - **Moderate Transmission:** Those states, CBSAs, and counties that during the last week reported from 10 to 49 cases per 100,000 population or a lab test positivity from 5.0% to 7.9%.
  - **Low Transmission:** Those states, CBSAs, and counties that during the last week reported from 0 to 9 cases per 100,000 population or a lab test positivity from 0.0% to 4.9%.
  - If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).
- **Shortages:** Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Includes hospitals currently reporting a staffing shortage. Low supply is defined as a hospital reporting they are not able to maintain a 3-day supply of N95s, face masks, gloves, gowns, or eye protection. Data is recent as of 10:21 EDT on 06/25/2021.
- **Vaccinations:** [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 13:22 EDT on 06/25/2021. Data last updated 06:00 EDT on 06/25/2021. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Allocations are made pro rata (equal based on population) from which jurisdictions are then to order. COVID-19 vaccines available in the U.S. are authorized only for persons ≥12 years of age (Pfizer-BioNTech) or ≥18 years of age (Moderna and J&J/Janssen). The following states have ≤80% completeness reporting vaccinations by county, which may result in underestimates of vaccination data for counties: CO (75%), VT (74%), WV (56%), GA (52%), VA (51%), TX (0%), and HI (0%).
- **Variants:** Data from [CDC COVID Data Tracker](#). Variant proportions are based on representative CDC sequence data (NS3 + CDC-funded contract sequencing) collected over a 4-week period ending June 5, 2021 for states with at least 300 sequences. Proportions are calculated using empirical (unweighted) data, which are subject to change over time and will be updated as more data become available. Proportions of variants do not represent the total number that may be circulating in the United States and may not match cases reported by states, territories, tribes, and local officials. For states and jurisdictions not listed, CDC has insufficient genomic surveillance data for the specified time period. Data updated by 19:00 ET on 6/22. Data pulled 11:59 EDT on 06/24/2021.

# DATA SOURCES & METHODS

STATE PROFILE REPORT | 06.25.2021

Color threshold values are rounded before color classification

Metric	Dark Green	Light Green	Yellow	Orange	Light Red	Red	Dark Red	Darkest Red
New cases per 100,000 population per week	≤4	5 – 9	10 – 49	50 – 99	100 – 199	200 – 499	500 – 749	≥750
Percent change in new cases per 100,000 population	≤-26%	-25% – -11%	-10% – 0%	1% – 10%	11% – 99%	100% – 999%	≥1000%	
Diagnostic test result positivity rate	≤2.9%	3.0% – 4.9%	5.0% – 7.9%	8.0% – 9.9%	10.0% – 14.9%	15.0% – 19.9%	20.0% – 24.9%	≥25.0%
Change in test positivity	≤-2.1%	-2.0% – -0.6%	-0.5% – 0.0%	0.1% – 0.5%	0.6% – 2.0%		≥2.1%	
Total diagnostic tests resulted per 100,000 population per week	≥5000	3000 – 4999	2000 – 2999	1000 – 1999	500 – 999		≤499	
Percent change in tests per 100,000 population	≥26%	11% – 25%	1% – 10%	-10% – 0%	-25% – -11%		≤-26%	
COVID-19 deaths per 100,000 population per week	0.0		0.1 – 0.9	1.0 – 1.9	2.0 – 4.9	5.0 – 9.9	10.0 – 14.9	≥15.0
Percent change in deaths per 100,000 population	≤-26%	-25% – -11%	-10% – 0%	1% – 10%	11% – 25%		≥26%	
Skilled Nursing Facilities with at least one resident COVID-19 case, death	0%			1% – 5%		≥6%		
Change in SNFs with at least one resident COVID-19 case, death	≤-2%		-1% – 1%		≥2%			
Confirmed and suspected new COVID-19 hospital admissions per 100 beds	≤2	3 – 5	6 – 10	11 – 15	16 – 20	21 – 25	≥26	
Confirmed new COVID-19 hospital admissions per 100 beds	≤1	2 – 3	4 – 5	6 – 10	11 – 15	16 – 20	≥21	
Change in new COVID-19 hospital admissions per 100 beds	≤-26%	-25% – -11%	-10% – 0%	1% – 10%	11% – 25%		≥26%	
Percent of hospitals with supply/staff shortages	≤9%		10% – 19%	20% – 29%	30% – 39%		≥40%	
Change in percent of hospitals with supply/staff shortages	≤-10%	-9% – -5%	-4% – 0%	1% – 4%	5% – 9%		≥10%	
Percent of Population Fully Vaccinated (State Level)	0.0 – 34.9%		35.0 – 39.9%		40.0 – 44.9%		45.0 – 49.9%	
							≥50.0%
